Sound Editor for.NET will allow you to record, edit, manipulate and analyze sound. Also you can create wav, mp3 and other formats. In addition to the basic audio operations you can also use richly textured visualization tools to analyze sound. Sound Editor allows you to edit single sounds in a variety of ways. You can use the Multimedia Mixer to adjust the volume of individual tracks. You can mute individual tracks (to silence them) or mute all the tracks. You can use the Spectrum Analyser to analyze the sound in the time-frequency domain to determine the sound's pitch, frequency, amplitude and other characteristics. Sound Editor allows the user to save WAV, MP3, Ogg, and WMA files. The WAV and MP3 file formats have a rich variety of metadata that will be recorded with the audio signal. Sound Editor also provides powerful waveform and spectrum display features. You can analyze the sound in the frequency-time domain (just like a waveform display) and in the time-frequency domain (like a spectrum display). You can also use the Text Display to display the waveform, spectrum or the audio wave. You can save and export the analysis in a variety of ways. The audio files can be saved to the local drive as WAV or MP3 files or to a WAV or MP3 streaming server (such as Icecast or Shoutcast) for immediate download or playback. Sound Editor can be used in many different ways. The Multimedia Mixer lets you adjust the volume of individual tracks. It also lets you mute individual tracks, mute all the tracks, get individual track(s) muted or solo, change the playback speed and change the panning. The Spectrum Analyzer lets you analyze individual tracks. You can use a built-in spectrum analyzer to examine the frequency-time domain of the tracks. You can also use the built-in multi-function equalizer to further adjust the frequency or amplitude of the sound. The user-made analysis tools include the amplitude, pitch, frequency, equalizer and other functions to analyze the sound. Sound Editor has a built-in sound editor feature. While you are editing a sound it shows the parameters of the sound as well as the custom spectrum, the global frequency-time domain and the user-created spectrum analyzers. You can easily save the edited

sound as a new track or as a WAV, MP3, Ogg or WMA file to the
