## About This Game

\*\*\*\*\*

Important: This game has no online functionality. It is LAN (Local Area Network) only. This means you have to be connected to the same router as your friends. This game could not be free otherwise.

\*\*\*\*\*

CAGE is a twist on the classic LAN arena shooter. It features lightning-fast gameplay fully exploiting all three dimensions of motion. The "tether" allows for unprecedented freedom and agility of movement, creating explosive action unlike any other shooter.

Features:

- 4 Maps: ThreeTowers, Stalks, Port, and Struct
- 3 GameModes: Deathmatch, KeepAway, and King of the (moving) Hill
- 9 powerful, satisfying weapons

CAGE is, and will always be, completely free to play, with no microtransactions. This game has been my passion project for the last few months, and I want as many people as possible to play it.

Bringing back the LAN party!

The movement in this game is very interesting. However as described there is no true online functionality as of now. Would be great if the developer was able to support this one day. Cage is a decent game and the controls are fine. It's just the awkward speed that makes it impossible to hit someone and also the occasional lag. So yeah, not recommended. This game cannot be played alone, but I think that is best. The fact that you have to play it on local networks means you only really play with friends. And friends are the people to play it with. This game is 100% guaranteed to make you and your friends have a great time as pitched battle erupts at a new pace. The grappling hook mechanic is really what sets it apart. I love flying across the map to deliver a crushing blow to my enemies. I don't know if I'm just crazy or this game is hilarious or a combination of both but whenever I play against mates I crack up. Maybe that is another thing good about this game. It is not serious. But I am serious about you getting this game. 11/10  
Needs bots tho to practice alone
