Brain get bobo 8/10 cans of Monster. My Brain hurts.. Ripple is a fun and challenging logic puzzle game. While the concept may not be particularly new i believe that the game does it well with a simplistic yet lovely art style.. Pros: - Trading Cards - Cheap - Controls are good for a puzzle game - Cool as a screensaver with nice color scheme Cons: - Gameplay feels very generic - You'll get bored of playing it after around 15 levels (there's 50 of them) - Some puzzles too easy, or too hard. NO GUIDE ON YOUTUBE - Achievements are way too sarcastic (there is literally an achievement called "I'm Loving This". *sarcasm*) - Doesn't bring anything new to the table Recommended for: People who just want to create badges, or collect some trading cards, only when the game is on sale. Anyone else should skip it and play better games instead. NOTES: I got this game for 66% off via a coupon for creating a badge, and i think it's worth only that.. Nice, but it's a little bit hard at more advanced levels, and sometimes i ragequit :DD
